

JOHN SWERIDUK

Software Engineer

Los Angeles, CA · 508-212-5768

jsweriduk@gmail.com · <https://www.linkedin.com/in/john-sweriduk/> ·
<http://github.com/johnsweriduk>

Dedicated full-stack developer with a focus on improving customer interaction. Relentless at solving problems, no matter how big or small. Passionate about team-based activities, at the job, online, or on the field.

SKILLS

- Full-stack developer: React, Django, NodeJS, ExpressJS, PHP, Javascript/jQuery, HTML/CSS
- Magento 1/2, Shopify, BigCommerce, Wordpress
- Experience working with others – have mentored others in web development, enabling them to get careers in their field

EXPERIENCE

9/2016 – PRESENT

WEB DEVELOPER, STACK & SIZZLE

Developed websites from Wordpress to websites built from the ground up. Experienced in working with multiple eCommerce platforms, as well as marketing and branding for treatment centers in the Greater Los Angeles area. Some notable projects were an age verification system for eCommerce shops using Magento 1,2, as well as Shopify, and a custom built web application that computes body measurements that integrates with a Shopify store.

PROJECTS

- [Weather Rock](#) – Weather forecasting app that displays the weather through a ‘weather rock’.
- [Space battle](#) – An interactive space-battle game built with Ajax and Javascript.
- [Root Stock](#) – An investment planning app built in Node/Angular.
- [Astroidr](#) – An interactive model of the solar system and several near-earth objects build with React and Django.

EDUCATION

GENERAL ASSEMBLY

Graduated from General Assembly’s Software Engineering Remote course.
